

### 3.2 LSCsegFind

Extend LSCsegFind syntax to retrieve a particular version of segment type T.

For example, **-t Science** should return the latest version of Science segments56Td-114.151-11.955Td[(whil

Rewrite LSCdqInsert client. Provide both command line and GUI versions.

LSCdqInsert client should be able to:1. retrieve segment list for the specified ve  
or load an arbitrary segment list from file;2. apply to the main segment list
